

## 1800wxbrief.com Training Session

General Aviation pilots are used to standard weather briefings that include extensive and comprehensive information about their route of flight and a whole lot more information that may or may not be pertinent to their flight. For years pilots have been asking for easy to understand weather and flight information specific to their needs with greater use of graphics and filtering. That is exactly what Lockheed Martin Flight Service is delivering online as a result of the feedback received from General Aviation pilots. Lockheed Martin will present the next generation briefing products available through 1800wxbrief.com.

**Directions:** Enter ERAU at Haas Blvd.. Follow Haas Blvd. to parking lot A, B, C, or D. From the parking lots, walk southeast towards Bldg. 74, the Academic Complex. Room 104 is on the first floor of the building.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
